Moviez App

[Problem Statement]

Develop a pseudo Front End Application which would let the users search for different movies online.

[Minimum Requirement]

— Use of Web API to fetch movies details.

- Utilise Response Parameters:

[“movie_title","director_name","actor_1_name","actor_2_name","genres","language","country","content_rating","budget","title_year","plot_keywords","movie_imdb_link"]

#Technologies used
HTML5, CSS3, JS, ANGULAR JS, MATERIALISECSS

#To run application:
open command prompt and type **live-server**
Note: if live-server not installed, type **npm i live-server**
